Customer Reviews

I have long been a fan of Rich Millington and the excellent advice he dispenses daily from his blog at FeverBee.com. For those involved with leading online communities, you need to go to FeverBee and subscribe to his updates. You’ll benefit from the brief, insightful posts he publishes nearly every weekday. I was extremely glad, therefore, when his book Buzzing Communities: How to Build Bigger, Better, and More Active Online Communities was published a few months ago. I readily digested it upon arrival and am eager to share these thoughts with you about the contents of the book, why it’s important, and what specific actions it has already prompted me to take in order to be a more professional and effective community manager. The book’s two parts and twelve chapters span nearly 300 pages and are devoted to the categories of "How to Manage Your Community" and
"Everything You Need to Know About Your Members," with the vast majority of space given to the former. The part on managing your community includes nine chapters: Strategy; Growth; Content; Moderation; Influence and Relationships; Events and Activities; Business Integration; Return on Investment; and User Experience. The second part includes: The Community Ecosystem; Competition - Existing Online Communities; The Audience - Demographics, Habits, and Psychographics; and a wrap-up on Community Management Success. Online community management is a relatively new profession that still lacks much in the way of formal training, education, certification, standards, and proven, documented, and accepted best practices.
