Free ebooks, Kindle Fire apps of the day, and much more. Would you like to go visit websites in one or two Kindle clicks? Or just one tap on Kindle Fire or K-Touch, Android, iPad, iPhone, or Nook? Do you want to get to Google search more easily and search Bing or Yahoo too? Now you can! Get rid of 's default bookmarks and forget those funny browser launching menus. Just click the item you want on this HOMEPAGE document and the browser opens, and -- there they all are -- the REAL places to get news, sports, stock info and quotes, travelers weather, free eBooks and audio books, your Email, and latest blogs about Kindling. Even shopping deals of the day. Click (or tap if you have a touch screen) what you want; it opens immediately and you're reading. This handy item turns Kindle surfing from awkward to slick! It lets Kindle be more like your PDA. It will sit at the top of your title-sorted homepage so it's always there for you. You can even download free ebooks and check or buy 's latest store items from it. Now includes lotteries, airline delays, celebrity news, and google and other calendars. Read what your favorite political analysts are saying this election year.. Sure, you could go bookmark a bunch of sites, but these links aren't just the ordinary ones you know about. All are tested to work well on your Kindle. Everything is labeled, organized and arranged in flip menus for quickest use. You get them all for the price of one latte. Extra special - INCLUDES TIPS ON BROWSER SETUP and use tips, and what to do if it freezes up. Plus all of 's own help for Your particular Kindle. And More! Buy this then check back once in a while for updated versions. Ask for additions and we may add them. You're going to love this, so get it now, you deserve it. Buy the latte, too. Q: Can I add my own links to these menus? A: No, it's a book document, so I have to do that in future editions. Enter a review and suggest additions (several readers asked for, so I've added weather and lottery links in the new addition). You still can create your own additional bookmarks though - once any site is open in your browser, the menu key or icon gets you to them, and there's lots of room because you won't need to keep all the unused default ones any more. But once you see how it's done you may want try your own version of menus Q: Why did you write this? A: For easier and quicker browser use. Actually, it's been here since 2008 - because typing anything on the original Kindle was s-l-o-w. And it still is on most Kindles. So many owners never tried using the built-in web browser; even though on a 3G Kindle it worked everywhere, when nothing else could... in parking lots, on a cruise, an island, Alaska. Do you have a touch screen? Great! This homepage still is the quickest access to particular websites, even on your new Kindle Fire. Q: Why isn't there a long list of all possible websites included? A: Then it becomes cumbersome to find an item, and it isn't quick to use, is it? (But if you

really want to bookmark a site we left off, so you can actually read it, or even make your very own homepage - well, we tell how to do that.)

Customer Reviews

The book does what it says. But the format is poor and some of the links no longer work. Not worth the price. You can create your own book very easily with some free tools available for converting HTML code to ".mobi" books which also work on the Kindle.

Neat idea, but there are a lot more popular sites I would like to see, weather information for example. Also, the sites are not optimized for kindle, so it makes navigating them pretty hard. Not sure if its worth the \$2.99.

This is my third Kindle, but only my first Kindle Fire. I am no "Electronic Guru", so I am taking my time discovering all of the many new operations that my new device can perform. So far, I just love everything that I have been able to use on it.

My Review. Why is this allowed where there has been no book purchase? There is something

wrong here when a review is allowed without a book purchase..... Is it just this book or is it allowed for all books? I am unable to tell because my Kindle, the sixth I have purchased, will not allow me to go anywhere other than the store. A disappointment from a product I loved...

This app does not work as advertised. It is locked on ancestry.com and will not change to any other page. What a disappointment. I believed the hype because it was from , but I will be a lot more careful now. Money down the drain.
