Time Series Modeling For Analysis And Control: Advanced Autopilot And Monitoring Systems (SpringerBriefs In Statistics / JSS Research Series In Statistics)

Synopsis

This book presents multivariate time series methods for the analysis and optimal control of feedback systems. Although ships' autopilot systems are considered through the entire book, the methods set forth in this book can be applied to many other complicated, large, or noisy feedback control systems for which it is difficult to derive a model of the entire system based on theory in that subject area. The basic models used in this method are the multivariate autoregressive model with exogenous variables (ARX) model and the radial bases function net-type coefficients ARX model. The noise contribution analysis can then be performed through the estimated autoregressive (AR) model and various types of autopilot systems can be designed through the state "space representation of the models. The marine autopilot systems addressed in this book include optimal controllers for course-keeping motion, rolling reduction controllers with rudder motion, engine governor controllers, noise adaptive autopilots, route-tracking controllers by direct steering, and the reference course-setting approach. The methods presented here are exemplified with real data analysis and experiments on real ships. This book is highly recommended to readers who are interested in designing optimal or adaptive controllers not only of ships but also of any other complicated systems under noisy disturbance conditions.

Book Information

File Size: 9747 KB

Print Length: 119 pages

Publisher: Springer; 2015 edition (May 14, 2015)

Publication Date: May 14, 2015

Sold by: Digital Services LLC

Language: English

ASIN: B00UWYPNN8

Text-to-Speech: Not enabled

X-Ray: Not Enabled

Word Wise: Not Enabled

Lending: Not Enabled

Enhanced Typesetting: Not Enabled

Best Sellers Rank: #1,269,233 Paid in Kindle Store (See Top 100 Paid in Kindle Store) #162

in Books > Computers & Technology > Hardware & DIY > Microprocessors & System Design >

Control Systems #1160 in Kindle Store > Kindle eBooks > Nonfiction > Science > Mathematics >
