Going to keep it right by my computer. I do wish the print was a little larger as I don't wear my glasses when one the computer, but do have to put them on to read the chart, then take my glasses back off to produce the doc.

Disappointing, a summary of capabilities. Does not answer "how do I do this" questions.

Great cheat sheet. Print is a little small.

Real handy for use with students and answering their questions when switching to being a GoogleDrive school.

Lot's of information and helpful tips. Bought a Chromebook and need help to learn more about Google Docs. Thank you

Info was six years old and outdated. This product was of no use to me, for learning charts and graphs. It has been filed away permanently.

I love this type of card with info that is all organized and useful.gg

I love it. It is more detail, right to the point.
