Customer Reviews

I had to get this book for class and I absolutely hate it with a passion! First off the MSDN guide for the Microsoft website is out of date in this book. The steps in the lab aren't accurate at all. And I wish there were more/better examples in the chapter. I think after this semester my teacher will definitely be revising the textbook for this course.

This book is so full of grammatical and logical errors it isn't even funny. Even our instructor hates the book.

I love it! I will never let go of it!!!

Very helpful for this certification. Fast shipping, reasonable cost and new. Completely as described
