The Case For Faith: A Journalist Investigates The Toughest Objections To Christianity (Case For ... Series)
Was God telling the truth when he said, “You will seek me and find me when you seek me with all your heart”? In his #1 bestseller The Case for Christ, Lee Strobel examined the claims of Christ, reaching the hard-won verdict that Jesus is God’s unique son. In The Case for Faith, Strobel turns his skills to the most persistent emotional objections to belief—the eight “heart barriers” to faith. This Gold Medallion-winning book is for those who may be feeling attracted to Jesus but who are faced with difficult questions standing squarely in their path. For Christians, it will deepen their convictions and give them fresh confidence in discussing Christianity with even their most skeptical friends. “Everyone—seekers, doubters, fervent believers—benefits when Lee Strobel hits the road in search of answers, as he does again in The Case for Faith. In the course of his probing interviews, some of the toughest intellectual obstacles to faith fall away.”—Luis Palau

**Synopsis**

The Case for Faith is a simple and readable book based on a good idea: interview top Christian thinkers about questions that many people see as roadblocks to faith. Strobel begins with just the right tone, an empathetic and poignant interview with elderly skeptic and one-time evangelist, Charles Templeton. Some of the interviews are pretty good, and all of them have something of value, for those who are looking for it. I doubt most of the interviewees would call themselves “fundamentalists,” as one reviewer describes them; certainly not Catholic philosopher, Peter Kreeft! Kreeft is generally good on the Problem of Pain, though some of his solutions may seem a bit post

**Book Information**

Series: Case for ... Series
Paperback: 320 pages
Publisher: Zondervan (February 25, 2014)
Language: English
ISBN-10: 0310339294
Product Dimensions: 5.5 x 0.9 x 8.5 inches
Shipping Weight: 6.4 ounces (View shipping rates and policies)

The Case for Faith is a simple and readable book based on a good idea: interview top Christian thinkers about questions that many people see as roadblocks to faith. Strobel begins with just the right tone, an empathetic and poignant interview with elderly skeptic and one-time evangelist, Charles Templeton. Some of the interviews are pretty good, and all of them have something of value, for those who are looking for it. I doubt most of the interviewees would call themselves “fundamentalists,” as one reviewer describes them; certainly not Catholic philosopher, Peter Kreeft! Kreeft is generally good on the Problem of Pain, though some of his solutions may seem a bit post
hoc to those who do not share Christian assumptions. Sometimes the honest bewilderment of Job seems preferable to clever philosophical answers. Not that Kreeft's answers are merely clever; it's a tough question, and there is a lot to what he says. William Craig is, as always, sharp (on miracles, here) informed about contrary positions, and accustomed to fielding questions in the environment of debates with top skeptics, not just Christian pep rallies, qualifies himself appropriately. Walter Bradley's discussion of the difficulty of life emerging from non-life was excellent. I only noticed one lapse. But it was a major one: he didn't mention the idea of molecular evolution, and Strobel didn't ask. I'm not sure that's a very good solution, and Bradley's arguments may largely answer it anyway, but not bringing the question up I found rather gauling. Ravi Zacharias did better than I expected on Jesus being the only way to God.

Like many American Christians, I was brought to church most Sundays and endured countless sermons and lessons. Despite this seemingly rich education on Christian principles, I never was exposed to a lesson or class on the existence of God; God's existence was assumed as fact. As I matured into my twenties and went to college, the existance of God was no longer taken for granted. I encountered many agnostics and atheists among my many college professors. The net result of their influence was to question my faith. I never lost my faith, but I found it was a faith that could not withstand scrutiny. Reading Lee Stobel's "The Case For Faith" continued in me my search for the certainty of my faith. Strobel's book is an excellent place to start investigating the issues that question one's faith. Like in his previous book, "The Case for Christ", Strobel presents interviews with several Christian apologetics that involve issues related to the veracity of the Christian faith. The issues are as follows: Can a real living caring God exist in a world filled with evil? Are the Biblical miracles really true? Is evolutionary theory enough to explain life on earth? Is there only one way to God - through Jesus? How can a loving God throw his created people in hell? Is the church's history, with its abuses, crusades, and inquisitions, a reason not to believe in Christianity? If I am filled with doubts, can I still be a believer? Mr. Strobel investigates each issue thoroughly. He approaches the issues as a skeptic who wants to be convinced of the truth. Strobel was once a skeptic himself and his investigative journalism convinced him of the truth of his Christian faith.
