Where Are Baby's Easter Eggs?: A Lift-the-Flap Book (Karen Katz Lift-the-Flap Books)
**Synopsis**

Little ones will love lifting the large, sturdy flaps in this sweet, irresistible board book to find Baby’s Easter eggs from Karen Katz. Where could the Easter eggs be? Children will discover colorful springtime objects under each of the six sturdy flaps until... they find Baby’s Easter eggs in a fold-out finale.

Age Range: 1 - 4 years  
Grade Level: Preschool and up

**Customer Reviews**

The book is great and the kids love it even my five and six year old. I buy at least 80% of what i need through . I did a lot of comparison shopping and very rarely found things at a lower price. This is especially true if you are a Prime member. What is throwing me is that , on more than one occasion, is selling their books for more than the book’s retail price listed on the back cover. Check it out for yourself! Now I’m worried about my other purchases. This is not the first book I have seen that they have done this with. I have sent them an email on some of the others but did not receive a reply. I decided the consumer should at least know this before deciding to buy books through . I gave the book a 3star rating because it is wonderful and some of you might not mind paying an extra $1.00 or 20% for it.

Karen Katz is whiz when it comes to entertaining babies and toddlers. The writing is short and
simple enough for a child to follow, my 16 month old daughter loves to lift the flap (which is sturdy and has lasted through several toddler attacks) and discover whatever we are looking for and while I read the short text she doesn’t have to wait too long and can easily understand it. The shiny and colorful pictures keep her interest and she learns new vocabulary as we look for Easter eggs and point at what we find. I have several of Katz’s books and they are an excellent way at teaching body parts and new words. I recommend these lift the flap books for any toddler.

I got this for my grandson for this past Easter but he was too young to understand it or open the flaps. Just recently he has been looking at it and can now open the flaps. He tore one of them off, but I taped it back. The book is well made, but he is at the age where he likes to take things apart and usually manages to do so. He loves this book, and it’s the first one he picks up out of many.

My daughter is 9 months old and just got this book from her Grandma in anticipation of Easter. She loves it, just like she loves all of the Karen Katz “Where Is/Are Baby’s ______?” lift-the-flap books. She also loves the Karen Katz touch and feel books, but not as much as the lift-the-flaps. (Incidentally, she’s not that into “Counting Kisses”, which is neither touch/feel or lift-flap, but maybe she will be when she understands counting better.) We’ve been making it sort of a holiday tradition that she gets a Karen Katz book for each corresponding holiday (Xmas, Valentine’s, Easter ...), and it’s so much fun!

I am confused, I am not sure whether all the pages were supposed to have glittery pictures or just some of them. I am disappointed because the pictures under the flaps have the appearance of photocopies of the actual glittery pictures. There is only sparkle on the cover and the last page. Do I just a defective book or is that how it’s meant to be? It is such a shame because the book would have been really cute.

I purchased this book for my 2 year old great-niece. I think she will have fun looking for baby’s Easter eggs. The illustrations are bright and colorful. My only concern is if the flaps are sturdy enough to withstand a lot of lifting and pulling. I guess time will tell. This is my first Karen Katz book purchase. I plan to purchase a different Karen Katz book for my granddaughter.

My daughter is obsessed with “Where is Baby’s Belly Button”, also by Karen Katz. I just know she will love this book we bought for her Easter basket. The drawings are cute and the colors are super
bright. I know she'll enjoy this one just as much as the other. Definitely worth picking up!

I have noticed that all of the "Where Are Baby's" series have downgraded in the past few years. They used to be touch/feel pictures under each flap, but now they are only flat 1D pictures. I wish they would start making them more sensory friendly. We used to love these books, but now they aren't so special.
