#6068 in Books > Engineering & Transportation > Engineering > Industrial, Manufacturing & Operational Systems

**Customer Reviews**

WOW! This book helped me turn a trunk full of parts and pieces (That I thought was junk) into a dozen Sets. The excellent photos and parts listings are very helpful when you need to know what exactly came with any given set. This book covers Cardboard and plastic structures and sets for barbie and all her friends and family, an excellent book for any collector.

I am delighted to own this book, not only because it does a quite perfect job of listing every little piece which came with some of Barbie’s early and Mod Era houses/cases/rooms, especially the rarer items, but because the photos are fantastic and fun - posing Barbie and her family/friends in these structures, in many of her wonderful period outfits, is simply genius! Demonstrating how to use some of these structures for displays of your collected Barbies, Marl creates a complete world in miniature. I was surprised to learn that the very old, cardboard furniture & structures designed for
Barbie have withheld the ravages of time much better than many of the molded plastic furniture sets/houses from the late 60's/early 70's. An excellent book, and a must-have for the scene-designing Barbie collector!

This is a very good reference for vintage structures, but be aware that it mainly covers the vintage era (pre-1973) with only a few select items up to 1975 or so. Still looking for that perfect reference book for those collecting Barbies from 1973 on...

This is a great book for reliving long lost toys, and in the case of us people in Australia where many of these items didn’t make it to our shores, what we missed out on as kids. For the collector, it is a good guide to what is still out there, probably waiting to be rediscovered in long lost closets or on ebay when they are given the opportunity for a new lease of life.
