Customer Reviews

To learn more about old photographs and their care, I ordered three books; *An Ounce of Preservation* by Craig Tuttle, *Collector's Guide to Early Photographs* by O. Henry Mace, and *Care and Identification of 19th Century Photographic Prints* by James Reilly. *Collector's Guide to Early Photographs* goes beyond describing the basic types (categories) of old photographs. It provides entire chapters detailing the descriptions of each category and sub-categories of old photographs. There is specific advice regarding collecting each category of old photograph, as well as advice on which photographed subjects (animals, children, etc.) images are most rare / plentiful for collectors. Also detailed are the various markings used to identify the manufacturer of the daguerreotype plates, and the cases (small frames) in which they were mounted. All of which is important for identification of prized photographs in a collection. Also included is a listing of notable early photographers (ten pages long) whose work is of particular interest to collectors. There is rarely a page in the book doesn't include at least one picture / illustration of a category of photographs,

photographed subjects, close up details of case markings, brass mats, etc. Approximately half the book is devoted to the non-paper based photographs (daguerreotype, ambrotype, and tintype) with the remaining half addressing the various paper based photographs. Except for a few pages regarding restoration of "cased images," this book does not provide any significant advice on care and storage of photographs. The advice is that restoration should be left to trained individuals, as just about anything you do will damage the print.
